

# Academic GP Registrar Program

**Are you interested in combining teaching, research, and clinical practice?**

**An academic registrar post is a salaried teaching and research placement that enables you to build your academic and clinical skills in a supportive, research-focused environment.**

As a registrar, you'll be part of an outstanding research team, giving you scope to work on your own research project or join a research project already underway, with support, supervision and professional development.

You will enjoy a varied week of teaching, research, clinical practice and professional development, providing you with new perspectives on General Practice and the possibilities of a career as a future academic and clinical leader.

**Academic Post registrars can undertake their post in either a metropolitan or rural academic department:**

## **Monash Department of General Practice, Notting Hill**

Monash's DGP is home to some of Australia's preeminent GP academics including Professor Danielle Mazza and Professor Grant Russell; award-winning medical educator A/Prof Claire Harrison and GP NHMRC Fellow Dr Liz Sturgiss. The DGP is a leader in primary healthcare education and research in Australia.

## **Monash Rural Health, Gippsland**

Monash Rural Health Gippsland has five clinical placement sites across the Gippsland region. We're improving the health of rural communities by developing a sustainable health workforce, and by undertaking targeted research programs that address priority health problems in rural populations. Academic Registrars will have an opportunity to work with experienced educators to contribute to all levels of medical student teaching.

## **FIND OUT MORE AND APPLY:**

Contact Dr Chris Barton  
03 9902 4495 or [chris.barton@monash.edu](mailto:chris.barton@monash.edu)

Looking for ideas for a research project? Browse **Supervisor Connect** to explore existing projects. We can assist you in developing a project that reflects your passion and interests.

## **ACADEMIC SUPPORT AND SUPERVISION**

You'll have 12-months supervision from Australian leaders in academic primary care in a supportive and collaborative academic environment.

## **GET HANDS-ON TEACHING EXPERIENCE**

You'll teach in the Monash medical program, gaining skills and confidence while you work under the supervision and mentorship of experienced medical educators.

## **DEVELOP YOUR ACADEMIC WRITING, PRESENTATION AND LEADERSHIP**

You'll be linked in with our exceptional DGP training program giving you the edge for future opportunities in academia, medical education and health policy.

## **SHAPE YOUR OWN UNIQUE RESEARCH PROJECT**

You'll be linked with an experienced research supervisor who will support you through all stages of your research project. They will help you refine your research question and shape your project as you develop skills and confidence in research.
