

Introduction

Over the 3 years of Core Generalist Training (CGT), registrars are expected to develop broad generalist knowledge, skills and attributes in primary, secondary and emergency care in a rural and remote context:

Community Primary Care	6 months
Emergency Care	3 months
Hospital In-patient Care	3 months
Rural or Remote Practice	12 months

Training Obligation

Whilst registrars may be able to train in a single location that meets the full breadth of experience, it is recommended that training is undertaken in at least two separate locations.

- Up to 24 months in comprehensive general practice to complete ACRRM and EV training requirements
- Up to six months CGT may be completed in a hospital setting to fulfil any gaps in CGT as per training plan

Accreditation Information

Practices are accredited based on the range of learning experiences offered at that location. A fully accredited practice offers the full breadth of learning experiences. Other accredited practices will offer some of the learning experiences but not all.

Registrars must ensure that they meet the range of learning experiences during their CGT placements and update their training plan to meet any identified gaps.

List of Accredited Practices

The list of accredited practices is for information only and subject to change. Registrars should not contact practices for the purposes of securing a position outside of the practice match time lines
